

RAJAT KRISHNAN

Payyanur, Kerala, India | +91 9778742750 | rajatkrishnan321@gmail.com | linkedin.com/in/rajat-krishnan77 | github.com/Rajat77a

SUMMARY

Computer science student focused on prompt engineering, LLM pipelines and applied generative AI, with a growing pull toward security. Skilled at crafting, testing and refining prompts across Claude, ChatGPT and Gemini, and at judging model responses for polish, consistency and accuracy. Shipped several products end to end with Cursor, OpenAI Codex and Google Antigravity, and took first place in a King of the Hill cybersecurity contest using an AI-driven approach. Holds 14+ certifications from Anthropic, Google Cloud, IBM and NASSCOM. Self-driven and build-first.

SKILLS

Prompt Eng.	Prompt crafting and tuning, LLM pipeline automation, response evaluation, behavior testing, cross-model adaptation (Claude, ChatGPT, Gemini)
Security	CTF and KOTH competitions (AI-assisted)
Languages	Python, Java, C, JavaScript, TypeScript Scikit-learn, Pandas, NumPy, Plotly, Streamlit, Folium
AI Coding	Cursor, OpenAI Codex, Google Antigravity, Claude Code Git, VS Code, n8n
Generative AI	Claude, ChatGPT, Midjourney, Runway, ElevenLabs, Canva AI
Web / Backend	Node.js, Express.js, MongoDB, SQLite, REST API, JWT
Human Lang.	English, Malayalam, Hindi, Arabic, Tamil
Interests	New AI tools, soccer and athletic training, content creation

EXPERIENCE

AI Fluency Intern, FlyRank AI (Remote)	July to August 2026
• Crafted, tested and tuned prompts that powered deployable websites assembled with AI assistance. • Compared responses from several models, rating polish, consistency and suitability for each use case. • Finished Anthropic's structured coursework and credentials, sharpening applied AI literacy and prompt-writing craft. • Backed full website builds with AI pair-programming tools, converting requirements into working products.	
Freelance AI Content Developer and Creative Designer, ZedWorks / IgniteWithoutCaffeine	June 2024 to Present
• Produced scripts, visuals and short-form videos for a wellness brand's Instagram and YouTube channels, owning the cycle from ideation through publishing and audience engagement. • Assembled branded product visuals, menus and marketing assets for cafes and small businesses, juggling briefs, revisions and delivery across concurrent clients. • Refined text, image and video generation routines to lift output standards and keep results coherent across differing client styles.	

PROJECTS

PrepPeer: AI Mock Interview Platform	2026
<i>TypeScript, Next.js Built with Cursor, Claude Code</i> • Launched a mock interview product for job seekers featuring role-specific question generation, instant four-dimension scoring, real-time peer leaderboards with percentile rankings and shareable score cards. • Iterated on the directions given to the model so generated questions and scores stay consistent and relevant across job categories.	
GridWatch: Energy Theft Detection System	March 2026
<i>Python, Scikit-learn, Streamlit, Pandas, NumPy, Folium, SQLite, Plotly Built with Cursor, OpenAI Codex, Google Antigravity</i> • Engineered a real-time monitor applying anomaly detection to 30 days of simulated per-consumer meter data, flagging tampering, bypass connections and slow-decline fraud with no labelled fraud records. • Added Loss Tracing, which compares transformer-level supply against summed consumer readings to expose pre-meter stealing that rule-based systems miss. • Rendered the simulated grid on an interactive map with colour-coded risk tiers, made for offline use. Owned every architectural call, leaning on AI assistants for speed.	
Bitcoin Sentiment Analysis	2026
<i>Python, Jupyter Notebook, Pandas</i> • Examined Hyperliquid trading data alongside the Crypto Fear and Greed Index to study how market mood relates to trader behavior and position sizing.	
University Event Management System	Jan to Feb 2025
<i>Node.js, Express.js, MongoDB, JavaScript, HTML5, CSS3, JWT, REST API Built with Cursor, OpenAI Codex</i> • Created a full-stack web app where 500+ students and faculty browse, register for and manage campus events through one mobile-responsive web interface. • Implemented three-tier access (Student, Faculty, Admin) with JWT authentication, university email validation and a QR code per registration. • Bundled dynamic event filters, an admin analytics panel and CSV export, directing architecture and scope with Cursor and OpenAI Codex assisting.	

EDUCATION

Integrated M.Tech, Computer Science Engineering, VIT-AP, Amaravati, Andhra Pradesh	2024 to 2029
High School Diploma, Ursuline English Medium School, Pariyaram, Kerala	2023 to 2024

ACHIEVEMENTS

1st Place, PWN Grounds (King of the Hill cybersecurity competition), V-TAPP 2026	11-12 Sep 2026
• Won VIT-AP's international tech-fest contest as Team Minnal, with AI assistance at the core of the approach.	

CERTIFICATIONS

- **Anthropic (2026):** Claude Code in Action; AI Fluency: Framework and Foundations; Claude 101
- **Google Cloud:** Introduction to Generative AI (Jan 2026) | **IBM SkillsBuild:** AI Ethics, MDL-220 (Feb 2026)
- **NASSCOM / MeitY:** Prompt Engineering Digital Fluency Badge (Nov 2025) | **Dubai Future Foundation:** 1 Million Prompters (Dec 2025)
- **JPMorgan Chase (Forage):** Quantitative Research Virtual Experience (Nov 2025) | **HP LIFE:** AI for Business Professionals (Nov 2025)
- **Canva Design School:** Graphic Design; Marketing with Canva; AI in the Classroom (Jul 2025)
